

# How to use your Clarks Junior Foot Measuring Gauge

Please read these instructions carefully before using the gauge.

It's simple and straightforward but there are a few important things to remember. The measurement taken will provide a guide to your child's shoe size and is best taken when the child is as still as possible. We recommend a couple of practice measurements on your child to help you achieve the most accurate measurement possible.

1

Make sure your child is **standing upright** and wearing socks which fit well. Place the measuring gauge flat on the floor and position their foot on it, with their heel in the heel rest. Ensure their weight is evenly distributed on both feet.

2

Hold down their toes and move the toe slide until it just touches the tip of their longest toe.

**Top Tip:** Make sure the foot is straight on the gauge.

3

Make a note of the length measurement indicated by the black lines in the circular window. **Don't forget to add any extra millimetres from the side scale to the number shown in the window.**

See our online video instructions at [clarks.thegoldenboot.co.uk](http://clarks.thegoldenboot.co.uk)

4

To take the width measurement **the tape needs to be positioned across the widest part of the foot.** Firstly, place a finger in the middle of your child's foot on the big toe side. Gently move it towards the toes. You will feel a slight bump which is the big toe joint.

5

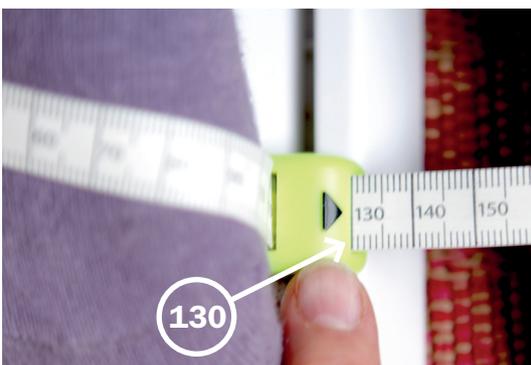

Slide one end of the tape until it sits at the centre of the joint at the base of the big toe.

6

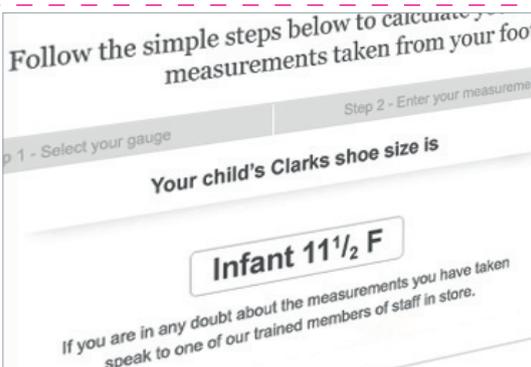

Slide the other end of the tape until it sits at the centre of the joint at the base of the little toe. **The tape should now be angled to follow the line of the joints.**

7

Pull **gently** on the tape until it just rests around your child's foot then make a note of the width measurement in mm **at the point indicated by the black arrow. Do not pull the tape tight as this will result in a narrow measurement.** Repeat all actions for the other foot.

8

Go online at: [clarks.thegoldenboot.co.uk](http://clarks.thegoldenboot.co.uk) and enter **the longest length measurement and widest width** in the size calculator. This will tell you your child's Clarks shoe size. If you are in any doubt about the measurements you have taken, simply visit one of our stores, where one of our trained members of staff will be happy to offer you a free measuring consultation.
